Do you need a pure sine wave inverter?

Energy Independence: If you're looking to go off-grid or just cut down on your electricity bills, a pure sine wave inverter is a must. It guarantees reliable power for all your needs. The Renogy 3000W 12V Pure Sine Wave Inverter is designed to deliver high-quality AC power for off-grid solar power systems.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.

How much does a sine wave inverter cost?

\$100-\$500 range: This is what you're likely to pay for most pure sine wave inverters on the market. These usually generate between 1,000 and 2,000 watts, so you can use one to power appliances in your off-grid cabin, RV, or boat. \$500 and above: This kind of money will get you a heavy-duty inverter with a power capacity from 3,000 to 12,000 watts.
